

UNISOL 6

Chemical composition

Combination of selected detergents and surface active substances free of chlorinated solvents.

Application

UNISOL 6 is a perfect stain remover for road grime.

To reduce the unwelcome and expensive spotting after dry cleaning more and more pre spotting agents are used.

Unisol 6 can be used as post spotting agent as well.

UNISOL 6 is not recommended to mix with other UNISOL products.

Properties

Appearance:	yellow liquid
Density (20°C):	approx. 1,0 g/cm ³
pH-value (10%):	approx. 7
Charge:	mixed ionogen

Dosage

UNISOL 6 is a stain remover suited for all solvents (water, perchloroethylene, silicone, hydrocarbon solvent, SENSENE™), UNISOL 6 works without leaving ring marks or stains. Hem test is mandatory !

The treated textile areas either should be covered with FLAROSOL – PRODUCTS before placing into the dry cleaning machine, or should be completely rinsed.

™Trademark of SAFECHEM

Use

UNISOL 6 is an acidified stain remover to dissolve stains of road grime, nicotine, urine, etc.

Use-Level

The use is usually dropwise directly on the stained area. The optimized dosing level has to be determined by test or by experience.

Storage 12 months in originally sealed packaging at room temperature (10 – 25°C). The product is sensitive to freeze and heat. Avoid direct sun light. Prolonged storage may cause a phase separation. In that case we recommend to homogenise the product thoroughly by using a low speed stirrer. Permanent stirring and high shear rates have to be prevented.

Packaging

- Dropping bottle (0,5L)
- PE can (5L)
- PE can (25L)
- PE drum with screw up (220L „L-ring“)
- Container (IBC 1000L)
